BEEF TRIM

Unworthy of selling into the VPP Beef Niche Market - BCS #1

September 2017

Hurricane Devastation

Southwest Region

The Dairy Quality Center is aware of the challenges faced by many of our friends in Texas, Florida and Georgia due to the recent hurricanes. Destruction of property, power outages, and flooding are physical damages that can be repaired. We are glad that you have an emergency response plan in place.

The Dairy Quality Center is also aware that your dairy may have to store milk, or dump milk, due to processing plants that are not functioning. Decreased demand for milk as consumers deal with their own damage creates a domino effect economically.

The Dairy Quality Center wants to hear from you (the producer) about ways that we can help you. Please contact us with any concerns you may have. We will do our best to help, or direct you to someone who can.

Our hearts and prayers are with you all.

Keith R. Carlson, Executive Director
Colette Johnston, Associate Director
Pam Clancy, Director of Sustainability
Scott Michael, Information Technology
